

Bobcat®

**GENUINE PARTS
BRISTLES**

A wide range of bristles, covering Bobcat® and other brands of attachments, lets you make a clean sweep of debris such as asphalt, clay, gravel, light snow and sand.

Technical specifications

Inner Diameter: 112 mm - 255 mm"

Outer Diameter: 420 mm - 815 mm

Ring Material: polypropylene / steel

Fibre Material: polypropylene / steel

Fibre Diameter: 1,0 mm - 4,0 mm

Recyclable.

Why buy original Bobcat Bristles?

Improved pitching ability

A brush roll consisting of Bobcat bristles has the form of dish openings that makes the sweeping more powerful and gives the broom improved pitching ability. And there is about 30% more brushing material in Bobcat bristles than in regular bristles.

Exact dimensions

A guaranteed exact inner diameter of the brush ring ensures an even wear of the broom.

Easy handling

Bobcat bristles can be used in all weathers.

The bristles can withstand even extremely cold temperatures without breaking out. Bobcat bristles are lighter when compared with traditional bristles, which reduces the sweeper weight. These products are non-corrosive and can be stored even outside, without fear of damages by humidity or frost.

Recyclable – reducing waste

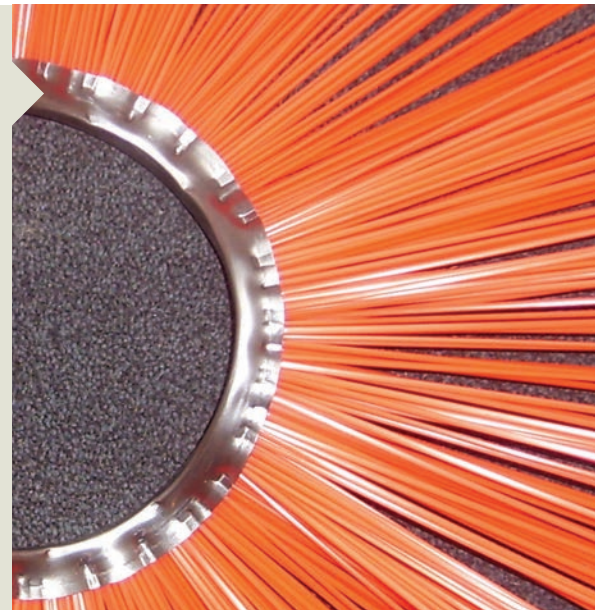

Due to its good fuel value, polypropylene is suitable for utilization of energy by incinerating it together with other waste. It can also be recycled and reused as raw material.

DESCRIPTION

Polypropylene bristles / Steel inner ring

- Designed for sweeping asphalt, clay, gravel, light snow, sand and other road debris
- Very resistant steel inner ring
- Inner ring features taps punched through the overlapping steel band, making the taps extremely stable and never loose.
- 2,5 mm thick polypropylene brushes, increasing ring longevity.
- Convoluted or flat design to fit all types of applications
- Convoluted (zig-zag) ring designed to be used without distance rings
- Fit most competitive brands

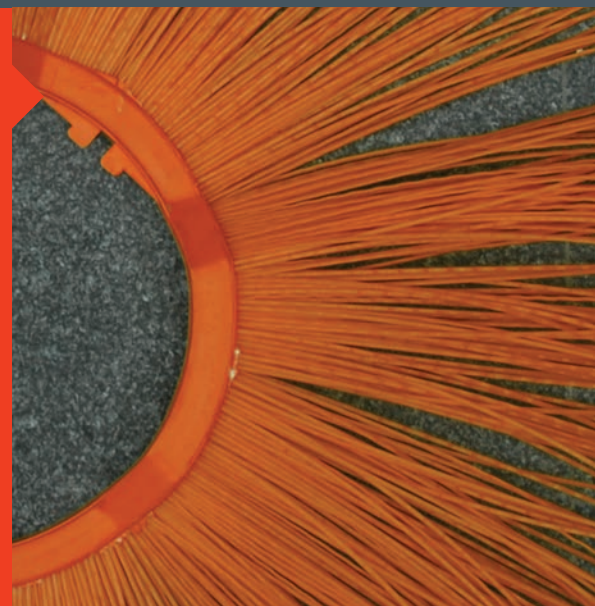

Steel bristles / Steel inner ring

- Designed for severe applications
- Very resistant steel inner ring
- Steel bristle material tied with steel wire
- Steel bristle material also glued inside the inner ring (extra precaution)
- Taps are punched through the inner ring, making the taps extremely stable and never loose
- Convoluted or flat design to fit all types of applications
- Convoluted (zig-zag) ring designed to be used without distance rings
- Fit most competitive brands

Polypropylene bristles / Polypropylene inner ring

- Designed for sweeping asphalt, clay, gravel, light snow, sand and other road debris
- 2,5 – 4 mm thick polypropylene brushes, increasing ring longevity
- Convoluted or flat design to fit all types of applications
- Convoluted (zig-zag) ring designed to be used without distance rings
- 100% recyclable
- Fit most competitive brands

IN THE DESCRIPTIONS

- R** stands for **Ring** (inner circle of the bristle)
- B** stands for **Bristle** (brushes material)
- Conv** stands for **Convolved** (zig-zag ring shape)
- Flat** refers to the **Flat** ring shape

Bristle packs can include 10, 20, 25 or 30 units

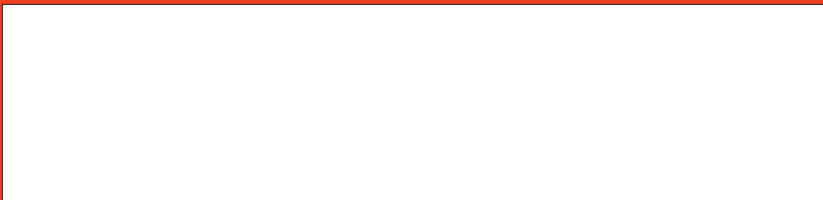

COMPATIBILITY MATRIX

- A** Angle broom 68" S/N 690100101 & above, Industrial Broom and Sweepers 44", 48", 54", 60", 72"
- B** Angle broom 68" & 84"
- C** Sweepers 54", 60", 72" & 84"

OTHER SWEEPERS

- D** Sweeper 44"
- E** Sweeper 48"
- F** Sweeper 72"
