

## ▶ Productive segregating

A segregator bucket is a perfect attachment for all kind of separations. Screening and separating was not so easy and productive before. Every machine driver can install this tool on site and start working immediately. This bucket range is maintenance friendly and very popular to demolition, road-construction and recycling companies.

The segregator bucket is like an ordinary riddle-bucket.

Two individually framed bar gratings are powered by a hydraulic motor, via an eccentric shaft, creating a reciprocating motion causing the under size materials to exit the bucket through the alternating bar spaces.

## ▶ Applications:

- Topsoil cleaning
- Cleaning of contaminated soils
- Brick cleaning
- Back filling of cable and pipelines
- Recycling of rubble
- Excavation of graveyards
- Loading of concrete crushers
- Cleaning of construction area's

“Such a popular attachment will turn into profit within a short while”
