## Tracked Stacker MTS2010M

## General:

The mobile tracked stacker MTS 2010M has been developed to pile up material easily and efficient. Thanks to the stacker a wheeled loader, which compresses the material, is not necessary and reduces production costs.

## Selling Points:

- Performance up to $600 \mathrm{to} / \mathrm{hr}$
- Long operation due to a large fuel tank (190 I)
- Integrates smoothly into your processing layout due to a height adjustable feed hopper
- Large feed hopper for an easy material feeding
- Easy accessibility to the engine compartment facilitates maintenance work
- Fast startup for more flexibility in your daily work
- Low diesel consumption gives lower operating costs
- Hydraulic folding conveyor belt makes transportation easy
- High mobility due to a crawler gear
- Easy to operate - one-man show
- Conveyor belt $20 \mathrm{~m}\left(65^{\prime}\right)$ long and $1 \mathrm{~m}\left(40^{\prime \prime}\right)$ width discharges material at a height up to $8,3 \mathrm{~m}$ (27.2')
- Fast amortization compared to a wheeled loader due to low operation and maintenance costs
- Material is not compressed by crawler- and/or wheeled equipment

## Feed material:

Bulk material such as rubble, concrete, asphalt, brick, natural stone, coal, cereal, wood chips, etc. up to 100 mm (4")
