## Trenchers that really dig their work!

Tackle tough trenching jobs with one of six Bobcat Trencher models.

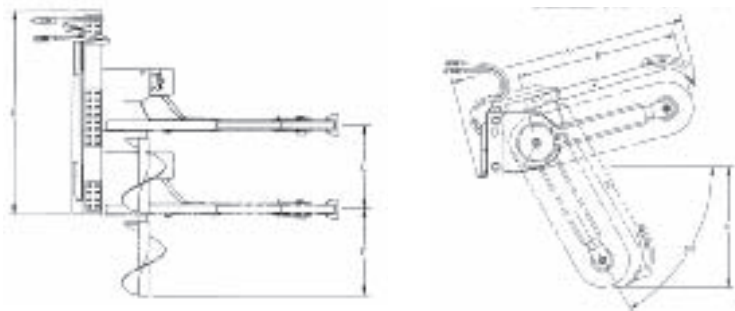

The LT112, LT213, LT313, LT405 and LT414 are designed and built specifically for Bobcat Loaders. That means versatile, reliable and cost-effective production as well as Bobcat warranty, parts and service support.

With 60 cm and 90 cm (optional) dig depths, the LT112 and LT213 are ideal for light-to-medium trenching jobs. The LT313, with its 90 cm or 120 cm (optional) digging depth, can easily handle medium-to-high production trenching. The LT 405 with a 120 cm digging depth and the LT414 with a 150 cm digging depth, are high-production trenchers for use on Bobcat Loaders with high-flow capability.

The LT112, LT213 and LT313 models feature manual side-shift with an optional hydraulic side-shift available on the LT213 and LT313. The LT405 and the LT414 feature hydraulic side-shift as a standard.
